

**KU LAB**

# Evolution and Ecology of Eukaryotic Microbes

## Lab Manager position available!

The Ku Lab studies the biology of marine calcifying algae, genome evolution and regulation in giant viruses, eukaryote evolution and diversification, and other topics related to eukaryotic microbes. We have a long-term core-funded position for a lab manager with strong communication and interpersonal skills to conduct and coordinate research and be in charge of lab maintenance and related administrative tasks. Our lab is part of the Institute of Plant and Microbial Biology, Academia Sinica (the national research institution of Taiwan), which has state-of-the-art equipment for cutting-edge science.

Candidates should be proficient in English, able to work independently and as part of a team, and highly motivated to learn and work in an academic environment. Research experience and skills in any of the following are desired: molecular biology, cell biology, microbiology, phycology, flow cytometry, microscopy, omics, programming, or bioinformatics. The starting salary depends on the academic degree (master's: ~20,000 USD/yr; PhD: ~30,000 USD/yr) and is commensurate with skills and abilities. The benefits include subsidized national health insurance, work insurance, and pension scheme. To apply, please send an email with the subject IPMB\_application\_LabManager\_YourName directly to Chuan Ku, briefly describing your research interests, experience, skills, future plan, and contact details of at least two referees. A single PDF should be attached that includes your CV, degree certificates, thesis title and abstract, publications, transcripts, and proofs of relevant skills and experience.
